

Narenthra Kishore Ramasamy

As a intern, I found myself surrounded by mentors who were dedicated to help me, and gave me the opportunity to put my classroom skills to test the real world circumstances. I am grateful to the CEO of the company for welcoming me to the family and preparing me for my professional careers after graduation.

Lekshmi Priya Saravanan

Internships teach you things that you cannot learn in the classroom. In my internship, I was more than just an intern, I was part of a team and I had to push myself to learn at a fast pace and to plan and execute a way to complete a project. Overall this experience was very beneficial to my career as I got to see different aspects of research.

Gowdham Subramaniam,
Head of Operations,
SeekaHost Ltd, UK.

For a student, the support and proper guidance is more important to showcase the hard work and talent. In KPRIET, the CSE department just gave me more opportunities at thier best and that allowed me to shine on the path on which I am interested in. Great support and proper guidance says everything about their execution of studies and extra curricular things.
