Outcome

The primary outcome of the event is an increased awareness and understanding of wearable devices for healthcare, especially in the context of elderly patients. Participants, including students and healthcare professionals, gained valuable insights into the transformative impact of wearable technology on health monitoring and management. This newfound knowledge equips them to make informed decisions about the use of such devices in patient care.

Event Summary

On October 13, 2023, the Association of Medico Sapiens hosted a webinar titled 'Wearable Devices for Elderly Patients' featuring Mr. Dhanasekar C as the guest speaker. The event commenced at 2:30 PM with an opening address delivered by Mruthikha S. The introduction of the esteemed Chief Guest, Mr. Dhanasekar C, was gracefully provided by Vallinayagam. Mr. Dhanasekar C then led an engaging session centered around the profound impact of wearable devices on the healthcare industry, particularly in the context of elderly patients. This discussion underscored how these devices have undergone significant transformation, offering invaluable health insights and promoting proactive health management. A question-and-answer session was thoughtfully organized to foster interaction and learning among the attendees, primarily benefiting students. The event attracted an impressive turnout, with over 120 participants actively engaging in the discussion. The session proved to be an abundant source of information and utility, a fact reflected in the positive feedback received from the participants. In appreciation of Mr. Dhanasekar C's contribution, a virtual memento was thoughtfully conveyed to him via email. The event concluded with a heartfelt vote of thanks to Chief Guest Mr. Dhanasekar C, eloquently delivered by Mruthikha S. This event exemplified the Association of Medico Sapiens' commitment to knowledge dissemination and its dedication to bringing valuable insights to its members and the broader healthcare community.
