CODE-A-THON

Event No	SDC001
Organizing Department	SDC
**Associate Dept.	NSC**	Ignittron Clubs
Date	27/03/2024
Time	10:00 AM to 12:00 PM
Event Type	Club Activity
Event Level	NSC
Venue	Oracle Lab
Total Participants	96
Students - External	96

Outcome

The 'Code-A-Thon '24' event leads to participants developing coding solutions across three difficulty levels: easy, intermediate, and hard. Outcomes include sharpened coding skills, problem-solving expertise, and competitive spirit, as individuals or teams tackle various challenges to produce effective algorithms or programmatic solutions within a set timeframe.

Event Summary

The 'Code-A-Thon '24' event, organized by the Software Development Club at the KPR Institute of Engineering and Technology, turned out to be a fantastic gathering for coding enthusiasts. Spanning over two hours, this event offered a platform for coders of various skill levels to showcase their talents through challenges categorized as easy, intermediate, and hard. It wasn't just a competition; it was an opportunity for all participants to enhance their coding skills in a supportive and engaging environment. As the tasks grew more complex, the participants had to dig deep into their problem-solving skills and creativity to come up with solutions, demonstrating their adaptability and innovative thinking under pressure. The event culminated in the awarding of cash prizes to the top three teams, recognizing their exceptional coding abilities and effort. Furthermore, the individual or team that clinched the first place was given a unique opportunity—an internship offered by the chief guest of the event. This prize underscored the event's aim to not only challenge the participants but also to provide them with real-world professional exposure. By linking academic learning with practical experience, the 'Code-A-Thon '24' significantly contributed to the participants' professional growth, making it a memorable and impactful event in their academic and career journeys.
