| 3 | Rajeshkumar V | Coordinator |

Outcome

Understand the basics of lean construction concepts. Outline its importance in civil engineering projects. Elaborated the membership features and benefits for industry persons and students.

Event Summary

Lean construction is critically important in civil engineering due to its emphasis on efficiency, waste reduction and continuous improvement. Department of Civil Engineering in association with Institute of Lean Construction Excellence organised a workshop for student and industry persons on the occasion of Industry Conclave 2024 on the topic 'Importance of lean construction in Civil Engineering'. Resource person for the workshop was Dr. K. Marimuthu, Technical Secretary, ILCE Chennai. He elaborated the importance of becoming a member to students, industry personnel in ILCE. He also deliberated the objectives of ILCE to the students. Objectives are as follows: To develop and disseminate lean practices in construction. Add value to all stakeholders through faster & more reliable project delivery. Promote co-operation between academic & research institutions and industry. ILCE's proactive approach focusses on helping you to increase efficiency and competitiveness. As a Member of ILCE, they will have access to access a world of opportunities such as Have access to a world of research and networking opportunities. Get a platform to enhance business and develop newer markets Receive discounts on events, workshops and more. Have access to regular webinars for knowledge enhancement Access to Best Practices in Construction and our rich book library Resource person interacted with the students and clarified their doubts.
