1	Resource Person	Anish Christopher	Quality Engineer	Rently Software Development	16cs007@kpriet.ac.in	xxxxxxxxxx

Involved Staffs

Sl	Name	Role
1	Kamaraj K	Coordinator

Outcome

Outcome of the program:

1. Interpret the fundamentals of Automated Software Testing
2. Demonstrate the Automated Software Testing Tools
3. Write automated functional tests for both front-end and back-end code

Event Summary

Mr. B. Anish Christofer, Quality Engineer, Rently soft ware development, Coimbatore was the resource person for the session. Mr. B. Anish Christofer is an alumni of 2016 - 20 batch, got placed in Rently through on campus as a Quaiity Engineer. He works on automated software testing tools.

He started the session with giving an introduction to the software testing and the categories of software testing (manual and automated testing), he also elaborated on the testing life cycle and the tools that are used for the automated software testing. The advantage and the disadvantages of the manual and the automated testing tools were also discussed during his presentation. Insight on the opportunities for the test engineers was also deliberated to the students. Difference between verification and validation was also discussed with a case study.

Resource person has taken a case study and demonstrated the Test Automation using the tool selenium. The case study is to automate the student portal (login) of KPRIET where the students see their results and pay fee through the portal. The tools that are used for the demonstration are Eclipse, Selenium and JDK. The tools were pre installed for the session. Students followed the step in automating the login of the KPRIET student portal. The hands - on session was an eye opening session on software testing and automation of testing. Students could able to understand and follow the step in creating an automation for his/her login page.

34 students from the III year A, B, and C section attended the session.
