Form the presented five problems, for each team one problem statement will be finalized and the team will be doing it as the mini project for this semester.
Many people around the world are suffering from mental health issues such as depression, anxiety, and stress. These conditions can have a significant impact on people's daily lives, causing them to feel overwhelmed, helpless, and isolated. Unfortunately, access to mental health resources and support is often limited, and stigma surrounding mental health can prevent individuals from seeking the help they need.
This problem affects individuals, families, and communities, and can lead to serious consequences such as suicide and substance abuse. It is crucial that we prioritize mental health and work to increase access to resources and support for those in need. By doing so, we can improve the overall well-being of individuals and create healthier, more resilient communities.
This event was coordinated by the students Mr.Vetrivel S, Mr. Sanjay Kand Ms. Dharanipriya M from I-CSBS.
The event was organized by Dr. R.Devi Priya, HoD/Computer science and Business Systems and Dr.T.RajaSekaran, Associate Head / Computer science and Business Systems
